

DHIVYA BHARATHI S - SOFTWARE ENGINEER

8072268887 shanmugamddivya2@gmail.com [LinkedIn](#) [GitHub](#)

ABOUT:

Full Stack Engineer experienced in building responsive and accessible web applications. Skilled in React, TypeScript, Node.js and UI development, with a strong interest in improving user experience, and collaborating closely with clients to deliver tailored solutions.

WORK EXPERIENCE: BIGTHINKCODE, Chennai

SOFTWARE ENGINEER - October 2024- PRESENT

- Built and maintained 65% of **Google Add-on** and **Microsoft Add-in** using React, Webpack, and TypeScript, HTML5, Sass ensuring high performance and code quality through best practices and Jest based unit testing.
- Collaborated with the UI/UX design team to align designs with business requirements, and contributed to managing user detail workflows within the portal using **JavaScript** and **API integration**.
- Written Dockerfile and Split the **Webpack** to improve build structure and CI/CD efficiency, reducing build time by 30% and contributing 60% to deployment.
- **Performed effective debugging using logs**, resolving issues in API integration and runtime behavior issues during Add-in development.
- Provided seamless communication with clients, maintaining a customer-first mindset to understand needs, resolve issues promptly, and deliver technical solutions that enhanced user satisfaction.

ASSOCIATE SOFTWARE ENGINEER-October 2023- October 2024

- Built a **SaaS** chatbot using LangChain and FastAPI, integrated with Microsoft Teams to automate support interactions, resulting in a 50% reduction in manual queries.
- Engineered the **chatbot migration** to the Objective Key Results product using React, resulting in a **30% faster response** time to user inquiries and improved user satisfaction scores by **35%**.
- Engineered the **frontend architecture** for the Assessment application using React JS, enabling 5x more concurrent users through functional programming, while actively communicating with clients to gather feedback.
- Contributed to the Farm Automation platform frontend using Elixir and ReactJS in an Agile setup. **Collaborated with cross-functional teams and participated in client discussions to understand technical requirements**, reducing feature delivery time by 20%

SOFTWARE INTERN- March 2023 - September 2023

- Built a **SaaS** application by integrating a React frontend with Django REST APIs, implementing 70% of the UI development and ensuring clean **API integration** with reusable components-resulting in a 35% reduction in QA bugs.
- Analyzed structured logs to trace issues, monitor system behavior, and ensure smooth end-to-end functionality.

SKILLS:

- **Languages:** TypeScript, JavaScript,Python,Tailwind CSS V4, Node.js
- **Web:** React, Redux, RestAPI, Webpack, Vite, Docker, HTML
- **Tools:** IDEs, debuggers, build tools, Git (version control), and Postman for API testing.
- **Microsoft:** Graph API, Excel Add-ins.
- **GenAI & ML:** LangChain, Prompt Engineering, LLMs, Vector Databases.

PROJECTS:

- **UI/UX** [[V3 Tailwind](#)]-Implemented responsive design using Tailwind CSS to build web pages to all screen sizes.
- **Voice Bot** [[BOT](#)] - Built a real-time, voice-enabled chatbot using **Ollama**.
- **Music Controller** [[WEB APP](#)]-Created a music control UI with Spotify **OAuth** integration, supporting user login, track control, and playback synchronization.

EDUCATION: Bachelor of Engineering, ECE | **CGPA - 9.3** - Sri Venkateshwara college of engineering.
