Experience

Data Analyst, MathCo – Bangalore

Jan 2024 – Present

- **Automated Trend Break Detection:** Automated anomaly detection in dashboard data by developing a **Python**-based trend break detection solution, reducing manual irregularity checks by **70%**.
- **KPI Library Development:** Developed a centralized KPI Library using **Power Apps** to manage key performance indicators used across more than 25 Production dashboards.
- **Geospatial Analysis:** Created a geospatial analytics tool in **Python** using **geopy** and **pandas** to calculate location distances with less than **0.5%** error margin.
- **Dashboard Data Source Migration:** Led data source migrations for **3** critical dashboards, transforming more than **15** complex database tables, managing schema overhauls, and ensuring seamless integration with **Power BI**.
- **QC Framework Development:** Designed and deployed a QC framework for Power BI dashboards, automating backend-to-visual data validation and ensuring 100% accuracy in production reporting
- **Predictive Analytics for Testing Rate Improvement:** Implemented predictive analytics modeling to identify accounts for improved testing rates and forecast trends using clustering (**K-Means**, **Hierarchical**) and time-series models (**SARIMA**, **Holt-Winters**, **Prophet**), achieving **85%+** forecasting accuracy.

TAC Engineer, Mavenir Systems – Bangalore

Oct 2023 – Dec 2023

- Used **Kibana** to monitor live network performance, allowing root cause analysis and resolving service disruptions, resulting in uninterrupted service for over 10,000 users.

Skills

- **Languages:** Python, SQL, DAX, HTML
- **Tools:** Power BI, Power Apps, Databricks, Jupyter, Excel
- **Techniques:** Trend Break Detection, Predictive Modeling, Clustering, Time Series Forecasting, Geospatial Analysis

Education

Sri Venkateshwara College of Engineering, ECE

Jul 2019 – May 2023

- GPA: 8.76/10.0

Publications

LoRa based conveying unit for armed force trooper monitoring system

June 2023

IJAEM

 Journal

Projects

Flight Finder - Find the Best Flight Deals

 Github

- Built a flight deal alert system using **Python**, integrating **Tequila** and **Sheety** APIs to monitor airfare and notify users of top deals featuring price drops of 30% or more.

Cricket Performance Insights with MCDM Techniques

 Github

- Performed advanced cricket analytics using Python, applying MCDM techniques like **Saaty scale** and **TOPSIS** to evaluate performance and derive strategic, data-driven insights from over 1,000 IPL match records.

Open Trivia Quiz App

 Github

- Designed an interactive quiz app using Python and **Tkinter**, integrating the **Open Trivia DB API** and applying OOP principles to manage game logic and real-time score tracking

Certification/Courses

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Mar 2025

Advanced DAX for Data Analysis (Udemy)

Mar 2025

Microsoft Power BI Desktop for Business Intelligence (Udemy)

Jul 2024
