Summary

Decision-focused Data Scientist with 2+ years of experience building enterprise BI dashboards, forecasting pipelines, and ML models for pharma clients – bridging the gap between raw data and strategic decisions across portfolio management, field targeting, and operational efficiency.

Experience

Data Scientist, MathCo – Bangalore Jul 2025 – Present

- **Predictive Analytics for Testing Rate Improvement:** Built a forecasting pipeline on fragmented, account-level data with no historical baseline, applying **K-Means** and **Hierarchical** clustering to segment accounts and **SARIMA**, **Holt-Winters**, **Prophet** for trend forecasting; achieved **85%+** accuracy, enabling the client to prioritise outreach using data rather than intuition for the first time.
- **Dashboard QC Automation (Databricks Genie):** Replaced a manual **SQL**-based validation workflow with a natural language-driven QC framework on **Databricks Genie**, cutting QC effort by **70%** and reducing turnaround time from days to hours across **Power BI** dashboards.
- **Competitive Intelligence Dashboards (Power BI):** Designed and maintained **4 enterprise-grade dashboards** tracking market share, sales trends, and competitor positioning across **20+ SKUs**; insights directly shaped quarterly launch strategy and portfolio decisions reviewed by senior leadership across marketing, sales, and medical affairs.
- **Dashboard Data Source Migration:** Led **SQL**-based migration of **3 critical Power BI dashboards**, rewriting **15+ complex queries**, managing full schema overhauls, and ensuring zero-downtime integration — preserving report integrity for daily business use.

Data Analyst, MathCo – Bangalore Jan 2024 – Jun 2025

- **Multi-Use Case Reporting Consolidation (Power BI):** Unified **4 separate reports** into a single dashboard covering launch tracking, lifecycle monitoring, and competitor benchmarking; standardised KPI definitions across **marketing, sales, and medical affairs**, eliminating conflicting metrics used in cross-functional reviews.
- **KPI Library Development (Power Apps):** Built a centralised KPI Library in **Power Apps** to govern performance indicators across **25+ production dashboards**, improving definition consistency and reducing onboarding time for new analysts.
- **Geospatial Analysis:** Engineered a geospatial analytics tool in **Python (geopy, pandas)** to map pharmacies to target hospital accounts by proximity; enabled tracking of product reach to key accounts with **<0.5% error margin**, supporting field sales targeting.

Skills

- **Languages:** Python, SQL, DAX
- **Libraries & Frameworks:** scikit-learn, geopy, Matplotlib, Seaborn, Prophet, SARIMA, Holt-Winters
- **Tools:** Power BI, Power Apps, Databricks, Jupyter, Excel
- **Techniques:** Predictive Modelling, Clustering, Time Series Forecasting, Text Classification, Hyperparameter Tuning, Dashboard Development, Data Visualization

Projects

Cricket Performance Insights with MCDM Techniques

 Github

- Analysed **1,000+ IPL match records** using **Python** and **MCDM techniques (TOPSIS, Saaty scale)** to evaluate batter performance across specific **match phases and conditions**.

Email Spam Detection (ML)

- Built a **text classification pipeline** in **Python/scikit-learn** benchmarking **Logistic Regression, KNN, SVM, and Random Forest**; applied **hyperparameter tuning** and **cross-validation**, achieving **96.8% accuracy** with the lowest false-positive rate across all evaluated models.

Education

Sri Venkateshwara College of Engineering – Electronics & Communication Engineering

Jul 2019 – May 2023

- GPA: **8.76 / 10.0**

Certifications

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Mar 2025

Generative AI Practitioner Certificate (Dataiku)

Sep 2025

Advanced DAX for Data Analysis (Udemy)

Mar 2025
